Upper Gastrointestinal Endoscopy (in Adults)

Policy Number: PG0449 Last Reviewed Date: 04/01/2025 Last Revised: 04/01/2025 HMO AND PPO ELITE (MEDICARE ADVANTAGE) MARKETPLACE

M PARAMOUNT

GUIDELINES:

- This policy does not certify benefits or authorization of benefits, which is designated by each individual
 policyholder terms, conditions, exclusions, and limitations contract. It does not constitute a contract or
 guarantee regarding coverage or reimbursement/payment. Self-Insured group specific policy will supersede
 this general policy when group supplementary plan document or individual plan decision directs otherwise.
- Paramount applies coding edits to all medical claims through coding logic software to evaluate the accuracy and adherence to accepted national standards.
- This medical policy is solely for guiding medical necessity and explaining correct procedure reporting used to assist in making coverage decisions and administering benefits.

SCOPE:

X Professional Facility

DESCRIPTION:

Upper gastrointestinal (GI) endoscopy or esophagogastroduodenoscopy (EGD) is usually performed to evaluate symptoms of persistent upper abdominal pain, nausea, vomiting, and difficulty swallowing or bleeding from the upper GI tract. EGD is more accurate than x-ray films for detecting inflammation, ulcers, or tumors of the esophagus, stomach and duodenum and can detect early cancer, as well as distinguish between benign and malignant conditions when biopsies of suspicious areas are obtained.

An EGD uses a flexible fiber-optic scope with a light and camera to examine the upper part of the GI system. The scope is inserted through the mouth into the upper GI tract allowing for direct visualization of the esophagus, stomach, and duodenum through the camera. This document does not address an upper GI endoscopy in children, wireless capsule endoscopy, virtual endoscopy, or in vivo analysis of gastrointestinal lesions via endoscopy.

Endoscopic Retrograde Cholangiopancreatography (ERCP) is a procedure that combines upper gastrointestinal (GI) endoscopy and x-rays to treat problems of the bile and pancreatic ducts. An ERCP is used to diagnose, evaluate, and treat problems that affect the pancreas and bile duct system, and to study the ducts that drain the liver and pancreas

Endoscopic Ultrasound (EUS) is a minimally invasive procedure to assess digestive (gastrointestinal) and lung diseases. It uses high-frequency sound waves to produce detailed images of the lining and walls of the digestive tract and chest, nearby organs such as the pancreas and liver, and lymph nodes.

POLICY:

Paramount Commercial Insurance Plans and Elite (Medicare Advantage) Plans

- Upper gastrointestinal (GI) endoscopy or esophagogastroduodenoscopy (EGD) does not require prior authorization when the coverage criteria indicated below is met.
- Appropriate ICD-10 diagnosis code (as listed below) required for coverage.

COVERAGE CRITERIA:

Paramount Commercial Insurance Plans

Upper gastrointestinal (GI) endoscopy or esophagogastroduodenoscopy (EGD) are covered for ICD-10 diagnoses codes as listed below supporting the coverage criteria indicated below.

Elite (Medicare Advantage) Plans

Upper gastrointestinal (GI) endoscopy or esophagogastroduodenoscopy (EGD) are covered for ICD-10 diagnoses codes as listed in CMS Billing and Coding Article's, may not be all-inclusive, A57414, A56389, supporting the coverage criteria indicated below.

Paramount Commercial Insurance Plans and Elite (Medicare Advantage) Plans

These procedures for adults aged 18 years or older can only be allowed if abnormal signs or symptoms or known disease are present.

Endoscopy procedures can only be allowed if abnormal signs or symptoms or known disease are present.

- 1. Indications which support EGD(s) for diagnostic purpose(s) are considered medically necessary for any of the following:
 - Upper abdominal distress which persists despite an appropriate trial of therapy;
 - Upper abdominal distress associated with symptoms and/or signs suggesting serious organic disease (e.g., prolonged anorexia and weight loss);
 - Dysphagia or odynophagia;
 - Esophageal reflux symptoms which are persistent or recurrent despite appropriate therapy (appropriate therapy consists of a 2–4-week trial of standard dose once daily PPI; in patients with partial response, the dose may be increased too twice daily);
 - Persistent vomiting of unknown cause;
 - Progressive difficulty swallowing;
 - Cirrhosis and portal hypertension but no prior variceal hemorrhage, especially those with platelet counts less than 140,000/mm;
 - Other systemic diseases in which the presence of upper GI pathology might modify other planned management; (Examples include patients with a history of GI bleeding who are scheduled for organ transplantation, long-term anticoagulation, and chronic non-steroidal therapy for arthritis;
 - Radiologic findings of:
 - A suspected neoplastic lesion, for confirmation and specific histologic diagnosis;
 - Gastric or esophageal ulcer; or
 - Evidence of upper GI tract stricture or obstruction;
 - The presence of gastrointestinal bleeding:
 - In most actively bleeding patients or those recently stopped;
 - When surgical therapy is contemplated;
 - When re-bleeding occurs after acute self-limited blood loss or after endoscopic therapy;
 - When portal hypertension (HTN) or aorto-enteric fistula (AEF) is suspected; or
 - For presumed chronic blood loss and for iron deficiency anemia when colonoscopy is negative;
 - When sampling of duodenal or jejunal tissue or fluid is indicated;
 - Evaluation of esophageal masses and for directing biopsies for diagnosing esophageal cancer;
 - To assess acute injury after caustic agent ingestion;
 - To assess diarrhea in patients suspected of having small-bowel disease (e.g., celiac disease);
 - Intraoperative EGD when necessary to clarify location or pathology of a lesion;
 - Diagnosis of irritable bowel syndrome when other studies (e.g., colonoscopy, enteroscopy, ileoscopy, capsule endoscopy, and flexible sigmoidoscopy) have negative results;
 - Differentiation of Crohn's disease from ulcerative colitis in indeterminate colitis;
 - Upper abdominal distress in patients who have undergone non-invasive testing for H. pylori, and whose symptoms persist despite eradication of H. pylori and have failed an appropriate therapeutic trial (e.g., proton pump inhibitor [PPI], with/without prokinetic, antidepressant);

- Upper abdominal distress in patients who are H. pylori negative and who have undergone an appropriate trial of PPI therapy (appropriate trial of therapy is a 2–4-week course of standard dose, once daily proton pump inhibitor);
- For patients with chronic (5 years or more) gastro-esophageal reflux disease (GERD) at risk for Barrett's esophagus (note: after a negative screening EGD, further screening EGD is not indicated);
- Patient has familial adenomatous polyposis (FAP) syndrome or attenuated FAP (follow-up at 6 to 12 months is considered appropriate if gastric adenomas of the duodenum are demonstrated, otherwise screening is not recommended more frequently than every three to five years).
- 2. Indications which support EGD(s) for therapeutic purpose(s) are considered medically necessary for any of the following:
 - Treatment of bleeding from lesions such as ulcers, tumors, vascular malformations (e.g., electrocoagulation, heater probe, laser photocoagulation or injection therapy);
 - For esophageal varices using endoscopic variceal ligation:
 - Sclerotherapy for bleeding from esophageal or proximal gastric varices;
 - Band ligation for bleeding from esophageal or proximal gastric varices;
 - Banding of varices
 - Foreign body removal;
 - Removal of selected polypoid lesions;
 - Placement of feeding tubes (peroral, trans-nasal, percutaneous endoscopic gastrostomy, percutaneous endoscopic jejunostomy);
 - Dilation of stenotic lesions (e.g., with transendoscopic balloon dilators or dilating systems employing guidewires);
 - Palliative therapy of stenosing neoplasms (e.g., laser, bipolar electrocoagulation, stent placement);
 - Management of achalasia (e.g., botulinum toxin, balloon dilatation);
 - Endoscopic therapy of intestinal metaplasia;
 - Management of operative complications (e.g., dilation of anastomotic strictures, stenting of anastomotic disruption, fistula, or leak in selected circumstances).
- 3. Sequential or periodic diagnostic upper GI endoscopy may be indicated for an appropriate number of procedures for active or symptomatic conditions, not an all-inclusive listing;
 - For follow-up of selected esophageal, gastric or stomal ulcers to demonstrate healing (frequency of follow-up EGDs is variable, but every two to four months until healing is demonstrated is reasonable);
 - For follow-up in patients with prior adenomatous gastric polyps (approximate frequency of follow-up EGDs would be every one to four years depending on the clinical circumstances, with occasional patients with sessile polyps requiring every six-month surveillance initially);
 - For follow-up for adequacy of prior sclerotherapy or banding of esophageal varices (approximate frequency of follow-up EGDs is very variable depending on the state of the patient but every six to twenty-four months is reasonable after the initial sclerotherapy/banding sessions are completed);
 - For follow-up of Barrett's esophagus (approximate frequency of follow-up EGDs is one to two years with biopsies, unless dysplasia or atypia is demonstrated, in which case a repeat biopsy in two to three months might be indicated);
 - For follow-up in patients with a severe caustic esophageal injury every 1 to 3 years;
 - For follow-up in patients with familial adenomatous polyposis. (Approximate frequency of follow-up EGDs would be every two to four years, but might be more frequent, such as every six to twelve months if gastric adenomas or adenomas of the duodenum were demonstrated).

Limitations

Indications for which EGD(s) are generally non-covered are as follows, not an all-inclusive listing:

- Distress, which is chronic, non-progressive, atypical for known organic disease, and is considered functional in origin (there are occasional exceptions in which an endoscopic examination may be done once to rule out organic disease, especially if symptoms are unresponsive to therapy);
- Uncomplicated heartburn responding to medical therapy; PG0449-04/01/2025

- Metastatic adenocarcinoma of unknown primary site when the results will not alter management;
- Radiological findings of:
 - Asymptomatic or uncomplicated sliding hiatus hernia;
 - Uncomplicated duodenal bulb ulcer which has responded to therapy; or
 - Deformed duodenal bulb when symptoms are absent or respond adequately to ulcer therapy;
- Routine screening of the upper gastrointestinal tract;
- Patients without current gastrointestinal symptoms about to undergo elective surgery for non-upper gastrointestinal disease;
- When lower GI endoscopy reveals the cause of symptoms, abnormal signs, or laboratory tests (e.g., colonic neoplasm with iron deficiency anemia). Exceptions can be considered if medical necessity for this procedure can be demonstrated;
- Surveillance for malignancy in persons with gastric atrophy, pernicious anemia, or prior gastric operations for benign disease (e.g., partial gastrectomy for peptic ulcer disease);
- Surveillance of healed benign disease (e.g., esophagitis or duodenal/gastric ulcer);
- Surveillance during repeated dilations of benign strictures unless there is a change in status;
- Surveillance of persons with achalasia;
- Surveillance of persons with previous aerodigestive squamous cell cancer;
- Surveillance of persons with gastric intestinal metaplasia;
- Surveillance of persons following adequate sampling or removal of non-dysplastic gastric polyps;
- When the results will not alter care of the patient.
- 4. The endoscopic retrograde cholangiopancreatography (ERCP) procedure is generally indicated for certain biliary and pancreatic conditions, not an all-inclusive listing;
 - Traumatic pancreatitis to accurately localize the injury and provide endoscopic drainage;
 - Pancreatic duct stricture evaluation;
 - First-line therapy for postoperative biliary leaks;
 - The extraction of bile duct stones in severe gallstone induced pancreatitis;
 - In detecting pancreatic ductal changes in chronic pancreatitis and the presence of calcified stones in the ductal system. A pancreatogram may be performed and is likely to be abnormal in chronic alcoholic pancreatitis but less so in non-alcoholic induced types;
 - In detecting gallstones in symptomatic patients whose oral cholecytogram and gallbladder ultrasonograms are normal;
 - In patients with radiologic imaging suggestive of common bile duct stones or other potential pathology;
 - Type I sphincter of Oddi dysfunction (SOD) requiring a sphincterotomy;
 - Pancreatic divisum;
 - Tissue sampling from the papilla or from the bile or pancreatic ducts to check for cancer;
 - Acute biliary pancreatitis with concomitant cholangitis or biliary obstruction.

Limitations

Indications for which ERCP(s) are generally non-covered are as follows, not an all-inclusive listing:

- For the diagnosis of pancreatitis without gallstone involvement;
- For the initial and early stages of patients with acute biliary pancreatitis without clinical evidence of bile duct stones or biliary obstruction;
- For treatment of malignant biliary obstruction in jaundiced patients who are candidates for curative surgery unless they require preoperative treatment of the obstructed duct;
- For treatment of patients with abdominal pain and suspected sphincter of Oddi dysfunction without specific anatomic or biochemical abnormalities referable to bile duct stones or the pancreas;
- For preoperative treatment of patients who are undergoing cholecystectomy for gallstones and who have a low probability of bile duct stones;
- For treatment of gallbladder disease without evidence of bile duct disease;
- For stenting of malignant pancreatobiliary obstruction in patients who are possible candidates for curative surgery, since stent insertion may complicate surgical resection;

- When the results will not alter care of the patient.
- 5. The endoscopic ultrasound (EUS) procedure is generally indicated for high-risk screening for one of the following conditions, not an all-inclusive listing;
 - Staging tumors of the gastrointestinal tract, pancreas, and bile ducts;
 - Evaluation abnormalities of the gastrointestinal tract wall or adjacent structures;
 - Tissue sampling of lesions within, or adjacent to, the wall of the gastrointestinal tract;
 - Evaluation abnormalities of the pancreas, including masses, pseudocysts, and chronic pancreatitis;
 - Evaluation of abnormalities of the biliary tree;
 - Providing endoscopic therapy of the gastrointestinal tract under ultrasonographic guidance;
 - Staging of tumors shown to be metastatic only when the results are the basis for therapeutic decision.
 - Providing access into the bile ducts or pancreatic duct, either independently or as an adjunct to ERCP

Limitations:

Indications for which EUS is generally non-covered are as follows, not an all-inclusive listing: Diagnosis of esophageal varices;

- EUS-elastography (for differentiation of benign and malignant pancreatic masses; differential diagnosis of malignant lymph nodes; for adrenal glands, hepatobiliary/gastrointestinal tract pathology (including anal canal), lung, mediastinum, and urogenital tract);
- Staging of tumors shown to be metastatic by other imaging methods (unless the results are the basis for therapeutic decisions);
- When the results will not alter care of the patient.

Paramount considers endoscopic functional luminal imaging probe (EndoFLIP) (impedance planimetry) **experimental/investigational** for the management of the following, not an all-inclusive list:

- Achalasia
- Dysphagia
- Esophagitis
- Esophagogastric junction outflow obstruction
- Fecal incontinence
- Gastro-esophageal reflux disease (GERD)
- Gastroparesis
- Prediction of clinical response to flexible endoscopy in Zenker's diverticulotomy
- Upper gastro-intestinal tract stenosis (including guiding therapy for esophageal stenosis).

CODING/BILLING INFORMATION:

The appearance of a code in this section does not necessarily indicate coverage. Codes that are covered may have selection criteria that must be met. Payment for supplies may be included in payment for other services rendered.

| CPT CODE | CPT CODES | |
|----------|---|--|
| 43191 | Esophagoscopy, rigid, transoral; diagnostic including collection of specimen(s) by brushing or washing when performed (separate procedure). | |
| 43192 | Esophagoscopy, rigid, transoral; with directed submucosal injections(s), any substance. | |
| 43193 | Esophagoscopy, rigid, transoral; with biopsy, single or multiple | |
| 43194 | Esophagoscopy, rigid, transoral; with removal of foreign body | |
| 43195 | Esophagoscopy, rigid, transoral; with balloon dilation (less that 30mm diameter) | |
| 43196 | Esophagoscopy, rigid, transoral; with insertion of guide wire followed by dilation over guidewire | |
| 43197 | Esophagoscopy, flexible, transnasal; diagnostic, includes collection of specimen(s) by brushing or washing when performed (separate procedure) | |
| 43198 | Esophagoscopy, flexible, transnasal; with biopsy, single or multiple | |

| 43200 | Esophagoscopy, flexible, transoral; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure) |
|--------------|--|
| 43201 | Esophagoscopy, flexible, transoral; with directed submucosal injection(s), any substance |
| 43202 | Esophagoscopy, flexible, transoral; with biopsy, single or multiple |
| 43204 | Esophagoscopy, flexible, transoral; with injection sclerosis of esophageal varices |
| 43205 | Esophagoscopy, flexible, transoral; with band ligation of esophageal varices |
| 43206 | Esophagoscopy, flexible, transoral; with optical endomicroscopy |
| | Esophagogastroduodenoscopy, flexible, transoral; with esophagogastric fundoplasty, |
| 43210 | partial or complete, includes duodenoscoy when performed |
| 43211 | Esophagoscopy, flexible, transoral; with endoscopic mucosal resection |
| | Esophagoscopy, flexible, transoral; with placement of endoscopic stent (includes pre-and |
| 43212 | post-dilation and guide wire passage, when performed) |
| | |
| 43213 | Esophagoscopy, flexible, transoral; with dilation of esophagus, by balloon or dilator, |
| | retrograde (includes fluoroscopic guidance, when performed) |
| 43214 | Esophagoscopy, flexible, transoral; with dilation of esophagus with balloon (30 mm |
| | diameter or larger) (includes fluoroscopic guidance, when performed) |
| 43215 | Esophagoscopy, flexible, transoral; with removal of foreign body(s) |
| 43216 | Esophagoscopy, flexible, transoral; with removal of tumor(s), polyp(s), or other lesion(s) by |
| 43210 | hot biopsy forceps |
| 40047 | Esophagoscopy, flexible, transoral; with removal of tumor(s), polyp(s), or other lesion(s) by |
| 43217 | snare technique |
| | Esophagoscopy, flexible, transoral; with transendoscopic balloon dilation (less than 30 mm |
| 43220 | diameter) |
| | Esophagoscopy, flexible, transoral; with insertion of guide wire followed by passage of |
| 43226 | |
| 40007 | dilator(s) over guide wire |
| 43227 | Esophagoscopy, flexible, transoral; with control of bleeding, any method |
| 43229 | Esophagoscopy, flexible, transoral; with ablation of tumor(s), polyp(s), or other lesion(s) |
| | (includes pre- and post-dilation and guide wire passage, when performed) |
| 43231 | Esophagoscopy, flexible, transoral; with endoscopic ultrasound examination |
| 43232 | Esophagoscopy, flexible, transoral; with transendoscopic ultrasound-guided intramural or |
| 45252 | transmural fine needle aspiration/biopsy(s) |
| 42222 | Esophagogastroduodenoscopy, flexible, transoral; with dilation of esophagus with balloon |
| 43233 | (30 mm diameter or larger) (includes fluoroscopic guidance, when performed) |
| 10005 | Esophagogastroduodenoscopy, flexible, transoral; diagnostic, including collection of |
| 43235 | specimen(s) by brushing or washing, when performed |
| | Esophagogastroduodenoscopy, flexible, transoral; with directed submucosal injection(s), |
| 43236 | any substance |
| | Esophagogastroduodenoscopy, flexible, transoral; with endoscopic ultrasound |
| 43237 | examination limited to the esophagus, stomach or duodenum, and adjacent structures |
| | Esophagogastroduodenoscopy, flexible, transoral; with transendoscopic ultrasound- |
| | guided intramural or transmural fine-needle aspiration/biopsy(s), (includes endoscopic |
| 43238 | |
| | ultrasound examination limited to the esophagus, stomach or duodenum, and adjacent |
| 10000 | structures) |
| 43239 | Esophagogastroduodenoscopy, flexible, transoral; biopsy; single or multiple |
| | Esophagogastroduodenoscopy, with transmural drainage of pseudocyst (includes |
| 43240 | placement of transmural drainage catheter[s]/stent[s], when performed, and endoscopic |
| | ultrasound, when performed) |
| 42244 | Esophagogastroduodenoscopy, flexible, transoral; insertion of intraluminal tube or |
| 43241 | catheter |
| | Esophagogastroduodenoscopy, flexible, transoral; with transendoscopic ultrasound- |
| 100.10 | guided intramural or transmural fine-needle aspiration/biopsy(s) (includes endoscopic |
| 43242 | ultrasound examination of the esophagus, stomach, and either the duodenum or a |
| | surgically altered stomach where the jejunum is examined distal to the anastomosis) |
| | |
| PG0449-04/01 | GZUZ) |

| 400.40 | Esophagogastroduodenoscopy, flexible, transoral; injection sclerosis of |
|--------|--|
| 43243 | esophageal/gastric varices |
| 43244 | Esophagogastroduodenoscopy, flexible, transoral; band ligation of esophageal/gastric varices |
| 43245 | Esophagogastroduodenoscopy, flexible, transoral; with dilation of gastric/duodenal stricture(s) (e.g., balloon, bougie) |
| 43246 | Esophagogastroduodenoscopy, flexible, transoral; with directed placement of percutaneous gastrostomy tube |
| 43247 | Esophagogastroduodenoscopy, flexible, transoral; with removal of foreign body(s) |
| 43248 | Esophagogastroduodenoscopy, flexible, transoral; insertion of guide wire followed by passage of dilator(s) through esophagus over guide |
| 43249 | Esophagogastroduodenoscopy, flexible, transoral; transendoscopic balloon dilation of esophagus (<30mm) |
| 43250 | Esophagogastroduodenoscopy, flexible, transoral; with removal of tumor(s), polyp(s), or other lesion(s) by hot biopsy forceps |
| 43251 | Esophagogastroduodenoscopy, flexible, transoral; with removal of tumor(s), polyp(s), or other lesion(s) by snare technique |
| 43252 | Esophagogastroduodenoscopy, flexible, transoral; with optical endomicroscopy |
| 43253 | Esophagogastroduodenoscopy, flexible, transoral; with transendoscopic ultrasound- guided transmural injection of diagnostic or therapeutic substance(s) (e.g., anesthetic, neurolytic agent) or fiducial marker(s) (includes endoscopic ultrasound examination of the esophagus, stomach, and either the duodenum or a surgically altered stomach where the jejunum is examined distal to the anastomosis) |
| 43254 | Esophagogastroduodenoscopy, flexible, transoral; with EMR (endoscopic mucosal resection) |
| 43255 | Esophagogastroduodenoscopy, flexible, transoral; with control of bleeding, any method |
| 43257 | Esophagogastroduodenoscopy, flexible, transoral; with delivery of thermal energy to the muscle of lower esophageal sphincter and/or gastric cardia, for treatment of gastroesophageal reflux disease |
| 43259 | Esophagogastroduodenoscopy, flexible, transoral; with endoscopic ultrasound examination, including the esophagus, stomach, and either the duodenum or a surgically altered stomach where the jejunum is examined distal to the anastomosis |
| 43260 | Endoscopic retrograde cholangiopancreatography (ERCP); diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure) |
| 43261 | Endoscopic retrograde cholangiopancreatography (ERCP); with biopsy, single or multiple |
| 43262 | Endoscopic retrograde cholangiopancreatography (ERCP); with sphincterotomy/papillotomy |
| 43263 | Endoscopic retrograde cholangiopancreatography (ERCP); with pressure measurement of sphincter of Oddi |
| 43264 | Endoscopic retrograde cholangiopancreatography (ERCP); with removal of calculi/debris from biliary/ pancreatic duct(s) |
| 43265 | Endoscopic retrograde cholangiopancreatography (ERCP); with destruction of calculi, any method (e.g., mechanical, electrohydraulic, lithotripsy) |
| 43266 | Esophagogastroduodenoscopy, flexible, transoral; with placement of endoscopic stent (includes pre- and post-dilation and guide wire passage, when performed) |
| 43270 | Esophagogastroduodenoscopy, flexible, transoral; with ablation of tumor(s), polyp(s), or other lesion(s) (includes pre- and post-dilation and guide wire passage, when performed) |
| 43274 | Endoscopic retrograde cholangiopancreatography (ERCP); with placement of endoscopic stent into biliary or pancreatic duct, including pre- and post-dilation and guide wire passage, when performed, including sphincterotomy, when performed, each stent |
| 43275 | Endoscopic retrograde cholangiopancreatography (ERCP); with removal of foreign body(s) or stent(s) from biliary/pancreatic duct(s) |

| Endoscopic retrograde cholangiopancreatography (ERCP); with removal and exchanged 43276 stut(s), billary or pancreatic duct, including pre- and post-dilation and guide wire passage, when performed, including sphincterotomy, when performed, each stent exchanged Endoscopic retrograde cholangiopancreatography (ERCP); with ablation of tumor(s), polyp(s), or other lesion(s), including pre- and post-dilation and guide wire passage, when performed Esophagogastroduodenoscopy, flexible, transnasal; diagnostic, including collection of specimen(s) by brushing or washing, when performed (separate procedure) especimen(s) by brushing or washing, when performed (separate procedure) especimen(s) by brushing or washing, when performed (separate procedure) especimen(s) by brushing or washing, when performed (separate procedure) especimen(s) by brushing or washing, when performed (separate procedure) especimen(s) by brushing or washing, when performed (separate procedure) especimen(s) by brushing or washing, when performed (separate procedure) especimen(s) and Z46.59 are allowed only for CPT codes 43275 and 43276 for the removal of a biliary stent. Note: Diagnosis code E43 is allowed for CPT 43246 only. Note: In addition to this list of ICD-10 codes, R93.2 is a covered diagnosis for CPT codes 43260, 43261, 43262, 43264, 43264, 43275, 43276, 43276, 43277, 43278, 43276, 43276, 4326, 43264, 4326, 4326, 4326, 4326, 4326, 4327, 4326, 4326, 4326, 4326, 4326, 4326, 4326, 4326, 4326, 4326, 4326 | | |

Z85.028Personal history of other malignant neoplasm of stomach

REVISION HISTORY EXPLANATION: ORIGINAL EFFECTIVE DATE: 11/28/2018

| Date | Explanation & Changes |
|------------|---|
| 11/28/2018 | Upper gastrointestinal endoscopy does not require prior authorization Appropriate ICD-10 diagnosis code (as listed above) required for coverage. |
| 12/09/2020 | Medical policy placed on the new Paramount Medical Policy Format. |
| 11/29/2021 | Added diagnosis code R93.2 to the diagnosis code list of covered diagnosis |
| | Policy created to reflect most current clinical evidence |
| 07/22/2022 | Added additional covered procedure codes |
| | Added additional covered diagnosis |
| 10/05/2022 | Corrected typo error, diagnosis from P59.21 to P59.29 |
| 03/06/2023 | Medical Policy updated to reflect Medicaid coverage to Anthem as of 02/01/2023 |
| 04/01/2024 | Medical Policy reviewed and updated to reflect the most current clinical evidence Added documentation indicating the diagnosis required/supporting coverage for each of the product lines - Paramount Commercial Insurance Plans as listed in the medical policy and Elite (Medicare Advantage) Plans as listed in the CMS LCD Billing and Coding Articles |
| 4/1/2025 | Medical Policy reviewed and updated to reflect the most current clinical evidence |

Paramount reserves the right to review and revise our policies periodically when necessary. When there is an update, we will publish the most current policy to https://www.paramounthealthcare.com/providers/medical-policies/policy-library
